

# Travel Companion App

02/27/2026 | 10:30 AM

**Note Taker:** Darius Rafeh

Attendees	Absentees
Varun Mange Darius Rafeh Kapil Yadav	Allen Paul (had an interview)
Adarsh Gella - Advisor	

## Activities Undertaken

- Went over our progress in UI/UX
- Talked about Rork App builder. Powerful but exporting is behind a paywall
- Went over Spec Sheet
- Database Visualization in Prisma Editor
- Talked about our monrepo and project structure
- Discussed about the potential features and challenges in designing the Travel LLM.  
Using groq to run AI inference.
- Talked about using Eden Treaty instead of an API contract because Eden integrates with ElysiaJS
- Will be using PostHog for analytics

## Next steps / TODOs

- Start working on Phase 1 tasks listed in the project specifications
- Setup the codebase
- Having working Authentication and Home page (both backend and frontend)
- Implement the prisma schema and run migrations
- Finish UI/UX
- Create a testing plan
- Have a working demo for next week
