Activities Undertaken

- Went over our strategy to scale to 100,000 users
- Deployment Alternative - Railway/Vercel
- Grid system can be used for nearby travelers
- Look into Zookeeper for automatic Master/Slave management
- Create read replicas of the database and always write to master
- Rahify - Travel guide app made by Adarsh
- Improved UX of our app

Next steps / TODOs

- Deploy the application (frontend + backend) for easy access
- Current backend should support at least 100 concurrent users
- Work on travel LLM
