Activities Undertaken

- Went over our tasks completed this week
- Showed our progress on the maps, explore, and social connect screens
- Discussed our progress in implementing PostHog and offline support
- Demoed our application and highlighted all the main features of our app
- For scalability - show that you use client-side caching, server-side caching, horizontal scaling, load balancer, read replicas, and a CDN.

Next steps / TODOs

- Build the app and deploy/share the APK file
- Try to finish the app development by next week
- Fix any minor bugs in the app
